ART UNIT: 2177

CONF. NO: 8660

For Discussion Only

4. A method in a computer system for exchanging economic data with a user, comprising:

receiving over a computer network a user request for a first item of economic data;

retrieving the first item of economic data from a database, wherein the first item of economic data is based, at least in part, on a subset of data having a sample size;

providing a first display description for view by the user over the computer network, the first display description including the first item of economic data;

providing a second display description for receiving a second item of economic data;

receiving a second item of economic data from the user over the computer network; and

updating the subset of data to now include the second item of economic data, for later display via the computer network, thereby updating the sample size
~~at least reducing a fee due from the user for receiving the first item of economic data.~~
